

Company History

Abela (Pty) Ltd was founded in 2009 by the current Management Team who set about developing their own vehicle leasing system while consulting to the local fleet management industry. Once our ABFleet Operating System was ready to deploy, a successful business funding transaction was concluded with Investec and other shareholders to launch a formal vehicle leasing business based in Johannesburg.

With over 80 years of collective corporate experience in our industry the time was right to develop a leasing system that delivered vehicle management solutions in a relevant, efficient and agile way. Since early 2015 we have grown steadily to over 600 vehicles, carefully crafting our systems and processes to meet our client's unique needs. Abela's valued independence means we get to select the best possible supplier partners to ensure the right application at the right price. Our expert team provides direct support to clients without any need to navigate through a call centre structure.

Vehicle Leasing Solutions

Abela's three core vehicles leasing solutions are based on a Full Maintenance Lease, Operating Lease and Dynamic Lease. We will advise on vehicle selection, manage the procurement process, report on contract performance and handle end of contract disposal administration across all three products. In many cases, our clients require flexibility in selecting specific services to be included or excluded depending on business need, vehicle type, usage application and several other important influences. We will qualify these unique needs and implement the best matched solution every time.

How ABELA works?

Pay for USAGE not OWNERSHIP is what our leasing products are based on. It's like renting your car at the airport when you are away on business, but for several years rather than days or weeks at a time! The typical Leasing Facility that we put in place for our clients is determined by taking into account their business type, vehicle selection, quantity, application and estimated annual kilometres to be travelled.... Not just your latest Audited Financial Statements!

We prefer dealing with like-minded clients and suppliers where attention to detail, prompt responses, integrity and value for money solutions are inherent in all our interactions.
